

Product Name: Life Reminders
Team Name: Off By One
Sprint Completion Date: 3/5/2015
Revision Number: 1
Revision Date: 2/25/2015

Goal: Finish connecting the backend functionality of the app with the front end user interface.

Format: (*story point + MoSCoW rating*) (*user story*)

Must Have:

- (7M) As a developer, I want to push user created notifications to the notification bar
- (7M) As a developer, I want to be able to delete user created lifestyle/notification/reminder
- (5M) As a user, I want to modify the lifestyle/reminder/notification
- (5M) As a customer, I want to be able to modify the settings
- (3M) As a customer, I want to add Reminders to individual Lifestyles or Notifications to individual Reminders

Task Listing, Organized By User Story, User Stories are in priority order:

- As a developer, I want to push user created notifications to the notification bar
 - Pull notification from storage
 - Create system that send notification to alarmManager
 - push notification, according to its settings (sound and vibration)
- As a customer, I want to add Reminders to individual Lifestyles or Notifications to individual Reminders
 - Use storage to add reminder/notification to selected lifestyle/reminder
 - Add button to lifestyle and reminder activity
- As a developer, I want to be able to delete user created lifestyle/notification/reminder
 - Implement a delete function
- As a user, I want to modify the lifestyle/reminder/notification
 - Create Notification page
 - Create lifestyle page
 - Create Reminder Page
 - Save changes made to selected lifestyle/reminder/notification/action lifestyle
 - Allow the AlarmReceiver to know what time the alarm is supposed to go off so it does not go off if the user changes the time of the notification
- As a customer, I want to be able to modify the settings
 - Create a settings page
 - Store the settings, so the system remembers them

Team Roles:

- Jayden Navarro : Product Owner
- Kevin Cheng : Team Member
- John Gemignani : Team Member
- Alex Gonzalez : Scrum Master for Sprint 3
- Josh Innis: Team Member

Initial Task Assignment:

- Jayden Navarro : Create Settings Page
- John Gemignani : System creation/deletion of objects
- Kevin Cheng : User Interface frontend action to functions
- Alex Gonzalez: Create Settings Page
- Josh Innis : Use storage to add reminder/notification to selected lifestyle/reminder
