

Product Name: Life Reminders

Team Name: Off By One

Sprint Completion Date: 2/20/2015

Revision Number: 1

Revision Date: 2/11/2015

Goal: Finish the back end part leftover from sprint 1 and create the UI and front-end that the user will see.

Format: *(story point + MoSCoW rating) (user story)*

Must Have:

-(13M) As a developer, I need to store reminders so that I can use reminders later. (Ability to be notified of reminder)

-(5M) As a customer, I need to be able to see the list of reminders I have set and their notification settings

-(8M) As a customer, I want to be able to add my own reminders so that I can customize it the way I want.

-(5M) As a customer, I need to be able to delete a reminder so that I won't be bothered with notifications I don't need anymore.

Should Have:

-(8S) As a customer, I need to be able to edit the information of a reminder so I can set each reminder the way I want

Task Listing, Organized By User Story, User Stories are in priority order:

As a developer, I need to store reminders so that I can use reminders later. (Ability to be notified of reminder):

- Store reminders with storage interface

As a customer, I need to be able to see the list of reminders I have set and their notification settings:

- get list of reminders from storage

- allow the user to go to edit settings for the notification

As a customer, I want to be able to add my own reminders so that I can customize it the way I want:

- setup "add new reminders"

- get UI to work with storage interface

- allow user to set times of reminders

As a customer, I need to be able to delete a reminder so that I won't be bothered with notifications I don't need anymore.

- setup "remove reminders"

- remove reminder from storage

- create verification in the broadcast receiver that the notification is still valid

As a customer, I need to be able to edit the information of a reminder so I can set each reminder the way I want

- allow user edit name of reminder
- allow user to edit time of reminder
- allow user to edit what happens when a reminder goes off
- setup "edit reminder" page
- allow it to interact with storage

Team Roles:

- Jayden Navarro : Product Owner
- Kevin Cheng : Team Member
- John Gemignani : Team Member
- Alex Gonzalez : Scrum Master for Sprint 2
- Josh Innis: Scrum Master for Sprint 2

Initial Task Assignment:

- Jayden Navarro : User interface, back end communication and testing
- John Gemignani : Finish storage, user interface
- Kevin Cheng : User interface and asset design
- Alex Gonzalez : Work on notification settings
- Josh Innis: Communication between UI and back end
